

ABA: 67767452

SCN

The image displays two coronal sections of a brain, likely from a rodent, showing blue fluorescence. The fluorescence is concentrated in the suprachiasmatic nucleus (SCN), which is the circadian pacemaker. The left section shows a more diffuse and lighter blue signal, while the right section shows a more intense and localized blue signal. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain sections and the horizontal line passing through the SCN region. The text 'ABA: 67767452' is located in the top left corner, and 'SCN' is located in the bottom left corner.
