

ABA:67792202

SC

This image is an axial PET scan of the brain. The scan shows a focal area of high uptake in the left hemisphere, indicated by a color scale from blue (low uptake) to red (high uptake). The uptake is localized to a small region in the left hemisphere, with a peak intensity in the red/yellow area. The rest of the brain shows low uptake, represented by blue. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA:67792202' is in the top left, and 'SC' is in the bottom left.
