

ABA: 68076912

SCN

The image displays two coronal brain slices, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The slices are presented in a side-by-side comparison. The left slice shows a small, localized area of blue fluorescence, indicating the presence of the ABA marker. The right slice shows a similar anatomical structure but without the blue fluorescence. A white crosshair is overlaid on the images, with the vertical line passing through the center of the SCN in both slices. The text 'ABA: 68076912' is located in the top left corner, and 'SCN' is located in the bottom left corner.
