

ABA:68077012

DM

The image displays a coronal section of a brain, likely from a mouse, with a blue fluorescent signal. The signal is most prominent in the lower-left quadrant, which is labeled 'DM' (dorsomedial nucleus). The signal appears as several bright spots and a faint, diffuse area. The rest of the brain section shows very little to no signal. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the DM region. The text 'ABA:68077012' is located in the top-left corner.
