

ABA: 68148693

MG

This is a brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly blue, indicating low levels of activity. A small, localized area of high activity is visible on the left side of the image, appearing as a bright yellow/orange spot. This area is located in the posterior region, possibly corresponding to the occipital lobe. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the area of high activity. The text 'ABA: 68148693' is displayed in the top left corner, and 'MG' is displayed in the bottom left corner.
