

ABA: 68269292

SPa ventral

The image displays two side-by-side brain scans, likely axial slices, showing a blue-colored region of activation. The scans are positioned symmetrically around a central vertical line. The blue area is roughly circular and occupies the central portion of each scan. The background is black. A thin white vertical line runs down the center, and a thin white horizontal line runs across the middle, intersecting at the center of the scans.
