

ABA : 68302245

Pn

The image displays two coronal brain slices. The left slice shows a small, localized area of increased activity (brighter blue) in the posterior region of the brain. The right slice shows a more prominent and larger area of increased activity in the same posterior region, extending further into the occipital lobe. A vertical white line is drawn between the two slices, and a horizontal white line is drawn across the bottom of the image, intersecting at the bottom of the right slice. The label 'ABA : 68302245' is located at the top left, and 'Pn' is at the bottom left.
