VMH

This image shows a coronal section of a brain with a blue fluorescent signal. The signal is concentrated in the dorsal part of the brain, specifically in the VMH (ventral medial hypothalamus) region. The signal appears as a vertical band of blue, with a few bright spots. The rest of the brain tissue is dark. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the bottom of the image.
