VMH

The image shows a coronal section of a brain. A large, irregularly shaped region in the left hemisphere is highlighted in a solid blue color. This region is located in the lateral and posterior parts of the brain, roughly corresponding to the area of the visual cortex and associated structures. The rest of the brain slice is shown in grayscale. A vertical white line runs down the center of the image, and a horizontal white line runs across the middle, intersecting at the center of the brain slice.
