

ABA: 68546434

ME

The image displays a brain scan, likely a PET or SPECT scan, showing two hemispheres. The left hemisphere (viewer's left) exhibits several distinct, bright spots of varying intensity, ranging from light blue to yellow, indicating areas of increased metabolic activity or tracer uptake. The right hemisphere (viewer's right) appears mostly uniform in color, with a dark blue to black hue, suggesting lower activity. A vertical white line runs down the center, separating the two hemispheres. A horizontal white line is positioned near the bottom of the image. The text 'ABA: 68546434' is located in the top left corner, and 'ME' is in the bottom left corner.
