LH

The image displays a coronal brain scan with a color scale from blue (low activity) to red (high activity). A vertical white line is positioned in the center, and a horizontal white line is positioned below the brain's midline. A prominent area of high activity, shown in red and yellow, is located in the lower-left quadrant of the image, corresponding to the LH label. A smaller, less intense area of activity is visible in the upper-left quadrant. The rest of the brain scan is predominantly blue, indicating low activity levels.
