

ABA: 68668078

A posterior

A brain scan image, likely an fMRI or PET scan, showing activation in the posterior region. The image is a grayscale heatmap where darker colors represent higher activation. The brain is shown in a coronal or axial view. The posterior region, which is the back of the brain, shows a prominent area of high activation, indicated by a bright yellow and red color. This area is located in the lower right quadrant of the image. The rest of the brain shows lower levels of activation, represented by blue and green colors. The image is overlaid with a white grid consisting of a vertical line and a horizontal line. The text 'ABA: 68668078' is located in the top left corner, and 'A posterior' is located in the bottom left corner.
