

ABA: 68744833

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a faint, localized blue-stained area at the bottom, which is identified as the SCN. The right section shows a similar but more prominent blue-stained area in the same anatomical location. A white crosshair is overlaid on the image, with the vertical line separating the two sections and the horizontal line passing through the SCN region. The text 'ABA: 68744833' is located in the top left corner, and 'SCN' is located in the bottom left corner.
