

ABA: 68795442

DM

The image displays two coronal slices of a brain, likely from a diffusion-weighted MRI scan. The left slice shows a focal area of hyperintensity (brighter blue) in the left hemisphere, which is characteristic of acute ischemic stroke. The right slice shows a more uniform, lower-intensity blue signal. A vertical white line separates the two slices, and a horizontal white line is positioned below the slices. The text 'ABA: 68795442' is located at the top left, and 'DM' is at the bottom left.
