

ABA:68798031

VMH

A fluorescence microscopy image of a brain section, likely a coronal slice, showing blue fluorescent signal. The signal is concentrated in the ventral medial hypothalamus (VMH) region, which is indicated by a white crosshair. The signal appears as several bright spots in the upper left quadrant and a larger, more diffuse area in the lower right quadrant. The rest of the brain section is dark, indicating low background fluorescence. The text 'ABA:68798031' is visible in the top left corner, and 'VMH' is visible in the bottom left corner.
