

ABA:68798310

S0

This is an axial brain scan, likely a PET or SPECT image, showing a cross-section of the brain. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA:68798310' is located in the top-left corner, and 'S0' is in the bottom-left corner. The brain tissue is represented by a blue color scale. A prominent, bright cyan-colored focal lesion is visible in the lower-left quadrant, indicating a region of increased metabolic activity or perfusion. There are also several smaller, less intense blue spots scattered throughout the brain, particularly in the upper and lower quadrants.
