

ABA: 68798633

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a more diffuse and less intense blue signal, while the right section shows a more concentrated and intense blue signal, indicating higher levels of activity or expression in that region. A white crosshair is overlaid on the image, with the vertical line separating the two sections and the horizontal line passing through the center of the brain sections. The text 'ABA: 68798633' is located in the top left corner, and 'SCN' is located in the bottom left corner.
