

ABA: 68843967

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a faint blue signal, while the right section shows a more prominent, dense blue signal, indicating higher levels of activity or expression in that region. A white crosshair is overlaid on the images, with the vertical line separating the two sections and the horizontal line passing through the SCN area. The text 'ABA: 68843967' is located in the top left corner, and 'SCN' is located in the bottom left corner.
