

ABA : 68844164

SN

This is an axial PET scan of a human brain. The image shows a cross-section of the brain with a color scale from blue (low uptake) to yellow/white (high uptake). A prominent focal area of increased uptake is visible in the left hemisphere, specifically in the posterior region. The rest of the brain shows relatively uniform, low-level uptake. A white crosshair is overlaid on the image, with the vertical line passing through the center of the focal area. The text 'ABA : 68844164' is located in the top left corner, and 'SN' is in the bottom left corner.
