

ABA : 69014404

CA2/CA3

A fluorescence microscopy image of a brain section, likely from a rat, showing a specific region of interest. The image is predominantly dark blue, indicating low fluorescence intensity. A small, bright blue spot is visible in the lower central region, representing a localized area of high fluorescence. The image is overlaid with a white grid consisting of two vertical and one horizontal line, dividing the field into four quadrants. The text 'ABA : 69014404' is located in the top left corner, and 'CA2/CA3' is located in the bottom left corner.
