

ABA : 69080003

GP

This image is an axial brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The image is divided into four quadrants by a vertical and a horizontal white line. The left side of the image (patient's right) shows a focal area of increased signal intensity, appearing as a bright yellow and red spot, which is labeled 'GP' (likely Globus Pallidus). The rest of the brain shows a relatively uniform, low-level signal, appearing as a dark blue color. The text 'ABA : 69080003' is visible in the top left corner.
