

ABA: 69114486

Pn

The image displays two grayscale brain scans, likely axial slices, positioned side-by-side and separated by a vertical white line. Both scans show a dark, irregularly shaped central region, possibly representing the brainstem or a specific anatomical area. The left scan features a small, bright, localized spot at the top edge, which is absent in the right scan. The overall texture of the scans is grainy, characteristic of medical imaging. In the top-left corner, the text 'ABA: 69114486' is visible, and in the bottom-left corner, the text 'Pn' is present.
