A anterior

The image displays a brain scan, likely a PET or SPECT scan, with a color scale from blue (low activity) to yellow (high activity). A prominent, localized area of high activity is visible in the lower-left quadrant of the brain, corresponding to the 'A anterior' label. The rest of the brain shows relatively low activity, represented by blue and dark blue colors. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the high-activity region.
