

ABA: 69116775

SCN

The image displays two coronal brain sections, likely from a rat, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section is labeled 'ABA: 69116775' at the top, and the right section is labeled 'SCN' at the bottom. Both sections show a blue-stained area in the hypothalamus, indicating the location of the SCN. The staining is more prominent in the left section, suggesting a response to the ABA treatment. The brain sections are set against a black background, and a white crosshair is visible, dividing the image into four quadrants.
