

ABA: 69133773

SPa ventral

The image displays two side-by-side brain scans, likely axial slices, showing a localized area of activation. The activation is represented by a bright blue spot located in the ventral region of the left hemisphere (the left side of the image). The rest of the brain area shown is a uniform dark blue. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the activation spot. The text 'ABA: 69133773' is located at the top left, and 'SPa ventral' is at the bottom left.
