

ABA : 69169851

SCN

The image displays two coronal sections of a brain, likely from a rodent, showing blue fluorescence. The fluorescence is concentrated in the central region, which is identified as the SCN (Suprachiasmatic Nucleus) in the text below. The brain sections are positioned symmetrically on either side of a vertical white line. A horizontal white line intersects the vertical one, creating a crosshair. The text 'ABA : 69169851' is located at the top left, and 'SCN' is at the bottom left.
