

ABA: 69170318

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The brain sections are stained in a bright blue color, indicating the presence of the ABA marker. The sections are positioned symmetrically on either side of a central vertical line, which represents the midline of the brain. The staining is concentrated in the central region of each section, corresponding to the SCN. The background of the brain tissue is dark, making the blue-stained SCN stand out prominently. The text 'ABA: 69170318' is located in the top left corner, and 'SCN' is located in the bottom left corner.
