

ABA : 69236646

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The brain sections are stained in a bright blue color, indicating the presence of the SCN. The sections are positioned symmetrically on either side of a central vertical line, which serves as a midline reference. The staining is concentrated in the central region of each section, corresponding to the SCN. The background of the brain tissue is dark, making the blue-stained SCN stand out prominently. The text 'ABA : 69236646' is located in the top left corner, and 'SCN' is located in the bottom left corner.
