VA/VL

An axial brain scan image showing activation in the VA/VL region. The image is a grayscale slice of a brain, with a vertical line indicating the midline. The activation is represented by a bright yellow/orange spot in the lower-left quadrant of the image, corresponding to the VA/VL region. The rest of the brain is shown in a dark gray color. The text "ABA : 69236694" is located at the top left, and "VA/VL" is located at the bottom left.
