

ABA: 69407176

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a faint, diffuse blue staining, while the right section shows a much more intense and localized blue staining, indicating a higher concentration of the marker in that region. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain sections and the horizontal line passing through the level of the SCN. The text 'ABA: 69407176' is located in the top left corner, and 'SCN' is located in the bottom left corner.
