

ABA: 69407833

DM

This image shows a coronal section of a brain with a blue fluorescence signal. The signal is localized to the left hemisphere (viewer's left) and is concentrated in the lower portion of the brain, likely representing the diencephalon. The signal intensity is higher in some areas, appearing as bright cyan spots. A vertical white line is drawn down the center of the brain, and a horizontal white line is drawn across the middle. The label 'ABA: 69407833' is in the top left, and 'DM' is in the bottom left.
