SCN

The image displays two coronal sections of a rodent brain, likely a rat, stained for the Suprachiasmatic Nucleus (SCN). The brain sections are shown in a dark blue color against a black background. A vertical white line runs down the center, separating the two hemispheres. A horizontal white line runs across the middle of the brain sections. The SCN is visible as a small, dark blue, oval-shaped structure located in the midline of the brain, just above the horizontal line. The text 'ABA : 69448686' is printed in white at the top left, and 'SCN' is printed in white at the bottom left.
