VMH

The image shows a coronal section of a brain. A large, irregularly shaped region in the left hemisphere is highlighted in a solid blue color. This region is located in the posterior part of the brain, roughly corresponding to the occipital and parietal lobes. A small, bright blue spot is visible at the top of this region. The rest of the brain slice is black. A white crosshair is centered on the image, with a vertical line and a horizontal line intersecting at the center.
