

ABA: 69818212

Cb vermis

A fluorescence microscopy image of a brain section, specifically the cerebellar vermis. The image shows a blue fluorescent signal distributed across the tissue. The signal is most prominent in the central and lower portions of the vermis, with some brighter spots. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA: 69818212' is located in the top-left corner, and 'Cb vermis' is in the bottom-left corner.
