

ABA:70201534

LH

This is a coronal brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly blue, indicating low levels of activity. A distinct, bright blue vertical streak is visible in the left hemisphere, suggesting a localized area of increased metabolic or functional activity. The brain is divided into two main halves by a central vertical line, and a horizontal line crosses the middle. The label 'ABA:70201534' is in the top left, and 'LH' is in the bottom left.
