

ABA:70201582

VMH

This fluorescence microscopy image displays a coronal section of a brain. The image is characterized by a dark background with a large, irregularly shaped, blue-stained area representing the brain tissue. A vertical white line runs through the center of the image, and a horizontal white line runs across the middle. Two distinct, bright blue spots are visible: one is located in the upper central region, and the other is in the lower left region. The text 'ABA:70201582' is in the top left, and 'VMH' is in the bottom left.
