

ABA:70205572

S0

This image shows a star with a protoplanetary disk. The star is a bright yellow-white point source at the center. The disk is a blue, ring-like structure surrounding the star, with a prominent gap in the center. The disk is oriented at an angle, showing its curved surface. The image is labeled ABA:70205572 in the top left and S0 in the bottom left. A white crosshair is visible in the center of the image.
