

ABA:70528671

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a very faint, localized blue-stained area in the lower-left quadrant, which is identified as the SCN. The right section shows a more prominent and widespread blue-stained area in the same anatomical region, also identified as the SCN. A white crosshair is overlaid on the image, with the vertical line separating the two sections and the horizontal line passing through the SCN area. The text 'ABA:70528671' is located in the top-left corner, and 'SCN' is located in the bottom-left corner.
