

ABA: 70539130

SCN

The image displays two coronal brain sections, likely from a rodent, stained with a blue fluorescent marker. The sections are positioned side-by-side and are bisected by a vertical white line. A horizontal white line is also present, intersecting the vertical one. The staining is concentrated in the central region of each section, corresponding to the SCN (Suprachiasmatic Nucleus). The text 'ABA: 70539130' is located in the top left corner, and 'SCN' is located in the bottom left corner.
