

ABA:70546105

Tg

A fluorescence microscopy image of a biological specimen, possibly a cell or tissue section, showing a bright spot in the lower-left quadrant. The specimen is stained with a blue dye, and the bright spot is a localized area of higher intensity, likely representing a specific marker or protein. The image is divided into four quadrants by a white crosshair. The text 'ABA:70546105' is in the top-left corner, and 'Tg' is in the bottom-left corner.
