

ABA:70743907

VA/VL

This is an axial PET scan of the brain. The image shows a cross-section of the brain with a color scale from blue (low activity) to yellow (high activity). A prominent area of increased activity is visible in the left hemisphere, centered around the midline. The activity is concentrated in a small region, appearing as a bright yellow spot. The rest of the brain shows relatively low activity, indicated by the blue color. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the scan. The text 'ABA:70743907' is located in the top left corner, and 'VA/VL' is located in the bottom left corner.
