

ABA:70743907

VPM/VPL

An axial PET scan of the brain showing bilateral activation in the VPM/VPL regions. The image is a grayscale heatmap where blue represents low activity and yellow/green represents high activity. Two distinct areas of high activity are visible in the posterior parietal region, symmetrically located on both sides of the midline. A white crosshair is overlaid on the image, with the vertical line passing through the center of the activation and the horizontal line passing through the lower part of the activation. The text 'ABA:70743907' is in the top left corner and 'VPM/VPL' is in the bottom left corner.
