

ABA:70920039

CA1

A fluorescence microscopy image of a brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant shows a bright, irregularly shaped region of fluorescence, primarily in shades of cyan and yellow, indicating high signal intensity. The top-right quadrant is mostly dark blue, indicating low signal intensity. The bottom-left quadrant shows a smaller, bright yellow-green spot. The bottom-right quadrant is dark blue. The overall image has a dark background, and the fluorescence is localized to specific areas.
