

ABA:71016663

M

A fluorescence microscopy image showing a cell with a bright spot at the center. The cell is roughly circular and has a blueish-purple hue. A bright, localized spot of light is visible at the center of the cell. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA:71016663' is in the top left, and 'M' is in the bottom left.
