

ABA: 71393442

SPa ventral

The image displays two side-by-side brain scans, likely from a rodent, showing SPa ventral activity. The scans are presented in a blue color scale against a black background. A vertical white line separates the two scans, and a horizontal white line is positioned below the scans. The left scan shows a more diffuse and less intense blue signal, while the right scan shows a more concentrated and intense blue signal, particularly in the lower portion of the brain. The text 'ABA: 71393442' is located at the top left, and 'SPa ventral' is located at the bottom left.
