

ABA: 71493063

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are stained with a blue dye, highlighting the SCN. The sections are positioned symmetrically on either side of a central vertical line, which represents the midline of the brain. The staining is most intense in the central region of each section, corresponding to the SCN. The text 'ABA: 71493063' is located in the top left corner, and 'SCN' is located in the bottom left corner.
