

ABA: 71495771

CA2/CA3

A fluorescence microscopy image of a brain section, likely from a mouse, showing the CA2/CA3 region. The image is a grayscale representation of a blue-stained area. The brain section is roughly circular with a central vertical groove. The CA2/CA3 region is highlighted in a bright, glowing blue color, primarily on the left side of the image. The rest of the brain section is dark, indicating low fluorescence. The image is overlaid with a white grid consisting of two vertical and two horizontal lines, dividing the image into four quadrants. The text 'ABA: 71495771' is located in the top left corner, and 'CA2/CA3' is located in the bottom left corner.
