

ABA: 71587782

CA2/CA3

A fluorescence microscopy image of a brain section, likely from a rat, showing the CA2/CA3 regions. The image is predominantly blue, indicating the presence of a fluorescent marker. The brain is divided into three vertical sections by two vertical white lines. The leftmost section shows a large, bright blue area, while the middle and right sections show smaller, less intense blue areas. The overall shape of the brain is roughly circular with a central vertical groove. The text "ABA: 71587782" is located in the top left corner, and "CA2/CA3" is located in the bottom left corner.
