A posterior

A posterior brain scan showing activation patterns. The image is a grayscale heatmap with a color scale from blue (low activation) to yellow (high activation). The brain is oriented with the posterior side at the top. A vertical white line is drawn through the center of the brain, and a horizontal white line is drawn across the middle. The activation is most prominent in the posterior region, with a bright yellow spot in the upper left quadrant and several other yellow and orange spots in the central and lower regions. The rest of the brain is mostly blue.
