

ABA:71656704

SN

This image is an axial PET scan of a human brain. The brain is shown in a cross-section, with the left side of the image representing the patient's right hemisphere and the right side representing the left hemisphere. A vertical white line indicates the midline. The brain tissue is primarily dark blue, indicating low metabolic activity. There is a distinct, bright cyan-colored area of increased uptake located in the left hemisphere, specifically in the posterior region, likely involving the occipital lobe. A horizontal white line is drawn across the middle of the brain slice. The text 'ABA:71656704' is located in the top left corner, and 'SN' is in the bottom left corner.
